74/100 · C2 Proficient

# Mokdad Anas

Full-Stack Developer · Cybersecurity Engineering Student

Tunis-Ariana, Tunisia · Available Summer 2026 · mokdadanas13@gmail.com

### PROFILE

Full-Stack Developer and Cybersecurity Engineering student at TEK-UP University, with 3 internships and a proven track record delivering production-ready applications. Experienced in cloud-integrated architectures, enterprise-level Azure SSO, and AI-powered solutions. Expanding expertise into Cybersecurity and Data Science with a Secure-by-Design mindset. C2 English proficiency and international collaboration experience. Open to Summer 2026 internship opportunities.

### PROFESSIONAL EXPERIENCE

#### Software Engineering Intern – Full-Stack Development

Feb 2025 – Jun 2025

Avaxia Group · On-site, Tunis

- Led end-to-end development of a containerized web app with Azure cloud identity management and AI features.
- Engineered decoupled architecture: React frontend + Django/FastAPI backend, deployed via Docker.
- Integrated Azure Active Directory (Entra ID) for enterprise SSO and role-based access control.
- Designed and deployed an AI Chatbot improving user support efficiency.
- Technical point-of-contact for international clients in multicultural settings.

React Django FastAPI Azure AD Docker AI Chatbot

#### Customer Service Agent

Summer 2025

Transcom Tunisia · On-site

- Handled international customer inquiries in a fast-paced call center environment.
- Strengthened professional English communication and cross-cultural interpersonal skills.

English Communication Problem Solving Teamwork

#### Web Development Intern – Backend Focused

Feb 2024 – Mar 2024

Avaxia Group · On-site, Tunis

- Built a functional web app using PHP and SQL with secure CRUD operations and session management.
- Optimized codebase for performance; deepened knowledge of MVC architecture patterns.

PHP SQL MVC Session Management

#### Junior Developer Intern

Feb 2023 – Mar 2023

Avaxia Group · On-site, Tunis

- Developed a lightweight Node.js backend application; mastered async programming and REST API foundations.

Node.js JavaScript REST APIs

### KEY PROJECTS

#### AI-Powered Employee Evaluation Platform (EvalApp · Avaxia)

AI · Full-Stack

End-to-end intelligent HR platform with LLM-powered personalized career feedback, Azure SSO, MySQL, and Agile Scrum delivery across 4 sprints.

React Django FastAPI Azure AD LLM/AI MySQL Docker

#### Workout Tracking Application

Full-Stack · Real-Time

Fitness app with dynamic dashboards, custom recommendation engine, real-time notifications, and user collaboration channel.

Angular Node.js Express MongoDB

#### IMDB Movie Analytics Dashboard

Big Data · Analytics

Transformed raw IMDB dataset into a multi-page Power BI dashboard using Talend ETL and a star schema data model.

Talend ETL Power BI Star Schema Data Modeling

#### Robot Management System (RMS)

Systems · C

Console-based C application for robot fleet management with per-user data isolation, CRUD, monitoring, and activity history.

C File Handling Custom Data Structures Systems Programming

### TECHNICAL SKILLS

**Frontend:** React.js Angular Flutter HTML5/CSS3 Bootstrap JavaScript

**Backend:** Django FastAPI Node.js Spring Boot Symfony/PHP SOAP/SOA

**Cloud & Security:** Microsoft Azure Azure AD/SSO Docker Red Hat Linux Cybersecurity

**Data & AI:** Python Talend ETL Power BI Big Data SQL AI Integration

**Tools & Methods:** Java/POOA C UML Agile Scrum Git MySQL MongoDB
